Professional Profile

Information Systems Analysis and Development Technologist with a proven track record of success in digital transformation. I have led projects that significantly increased operational efficiency, implemented automation solutions that optimized processing times, and developed RESTful APIs that improved systems integration. Expert in PHP, JavaScript, and MySQL, I combine technical skills in Docker, Laravel, Vue, React, and WordPress with a passion for innovation in mobile applications, web applications, and artificial intelligence. I seek to lead transformative projects in backend development and cloud computing, driving teams toward technical excellence and delivering exceptional value.

Information Systems Analysis and Development Technologist with over two years of experience in PHP development, using frameworks such as Laravel and CodeIgniter. Expert in implementing agile SCRUM methodologies, front-end development with React and Vue.js, and managing PostgreSQL databases. With solid knowledge of SOLID principles and design patterns, I have led projects that optimized operational processes and improved systems integration. Passionate about innovation and technical excellence, I seek to contribute to transformative projects in back-end development and cloud computing.

I currently reside in Vélez, Santander, and am fully available to relocate. I have worked for over six months in Bogotá and over a year in Medellín, in addition to having worked from home for the past year. I am open to freelance work, either remotely, hybrid, or in-person.

I love exploring new places and am always open to exploring new opportunities and experiences.

Work Experience

Semi-Senior Developer, LinkTIC, Remote

August 2024 - January 2025

- I developed and maintained applications using various technologies such as PHP, Java, and Docker, working remotely.
- I participated in the development and updating of cross-platform mobile applications using Xamarin, implementing improvements and new features. I
- analyzed assigned requirements and developed components following development best practices.
- I performed query optimization and maintenance of SQL and MySQL databases, including implementing migrations and performance improvements. I
- ensured compliance with operational processes, information security policies, and internal company guidelines.
- I participated in key meetings to understand the scope of the project and collaborate on the technical design of solutions.
- I worked on various projects in teams and remotely, using technologies such as PHP, Java, Docker, Azure DevOps, SQL, MySQL, Xamarin, JavaScript and Linux.

Software Developer, Wescreativo, Medellín/Remote

July 2022 - May 2024

- I used Laravel and React with Inertia to develop important features of the project.
- I worked closely with a team of developers and designers to ensure a smooth integration of features and functionality.
- I used Git as a version control tool for efficient code management and resolved production issues while improving project performance and scalability. I implemented automated testing,
- participated in regular team meetings, and kept documentation up-to-date for effective knowledge transfer.
- I worked on various projects as a team, remotely, using technologies such as Node.js, Tailwind CSS, WordPress, TypeScript, Docker, Git, DigitalOcean, Cloudflare, CyberPanel, and AWS S3.

Software Developer, Indoamericana, Bogotá

November 2021 - May 2022

- I developed and maintained web applications using PHP and JavaScript, ensuring the implementation of efficient and scalable solutions.
- I collaborated with team members on developing new features, optimizing code, and fixing bugs to improve system stability. I implemented queries and
- optimizations in MySQL databases to improve application performance and efficiency.
- I used Git and GitHub for version management, ensuring a structured and collaborative workflow.
- I worked collaboratively on projects, utilizing technologies such as PHP, JavaScript, MySQL, Git, WordPress, Vue, and Laravel to develop modern web solutions. I participated in
- technical meetings to discuss requirements and propose improvements to application architecture.

Skills

- **Languages:**Python, PHP, JavaScript, Java, SQL, Node.js
- **Cloud technologies:**Basic knowledge of AWS (Lambda, S3, IAM), DigitalOcean
- **Frameworks:**Laravel, Vue.js, React, CodeIgniter, Django, Next.js, FastAPI (in learning)
- **Databases:**MySQL, NoSQL **Version control:**Git, GitHub
-
- **Web technologies:**HTML, CSS, Bootstrap, jQuery, Tailwind CSS
- **Others:**RESTful APIs, Docker, Linux

Education

- **Technologist in Information Systems Analysis and Development**-SENA, Vélez / Santander -*March 2020 - October 2022*
- **Currently studying English**-Smart Language Academy **Currently a systems engineering student**-UNAD
-

Achievements

Platzi scholarship:I was selected as a Platzi intern after excelling in the Solidity challenge with CELO, thanks to my dedication and programming skills. During this process, I solved complex problems, acquired new development techniques, and completed all assigned tasks, demonstrating a high level of commitment and continuous learning. This experience strengthened my knowledge of blockchain and decentralized development, preparing me to contribute effectively to innovative technology projects.

Certifications

SIGN

- Variables and Control Structures in Object-Oriented Programming: Java Application
- Development with Graphical Interface, Event Handling, Classes and Objects: Java Application
- Development with In-Memory Data Management: Java
- Digital Skills Development for Information Management and
- Mobile Development Analysis with App Inventor
- Digital Apprentice
- Life Skills English Dot
- Works 2 Networks and
- Security

LinkedIn

- Essential HTML and CSS Integration
- Programming Fundamentals: Object-Oriented Design
- GitHub for Developers
- Essential HTML

Coursera

- How to Solve Problems and Make Decisions Effectively (University of California, Irvine) Data
- Analysis with Python (IBM)

Platzi

- Frontend with React.js**(Platzi race)** Backend Web
- Development with PHP**(Platzi race)** Practical
- JavaScript
- Professional JavaScript
- PHP Laravel Course
- Introduction to Laravel
- Laravel SPA
- Laravel Advanced
- Advanced PHP
- Vue Advanced
- Vuejs Professional
- Git and GitHub
- Digital Economy
- History of Bitcoin
- History of Ethereum
- Bitcoin Blockchain
- Fundamentals of Software Architecture
- Professional Software Architecture
- Prework for Blockchain Application Development 2021
- Java SE Object-Oriented
- Introduction to Solidity
- Introduction to Celo with Solidity
- Docker Course
- Angular: Creating Web Applications

Languages

- **Spanish:**Native
- **English:**Competent (A2)

Additional information

- I'm currently enrolled in an English program at Smart Language Academy, strengthening my oral and written communication skills. I'm currently
- pursuing a degree in Systems Engineering at UNAD, having completed approximately 40% of the academic program. I'm passionate about clean
- code and best practices in software development.
- Quick learner with strong problem-solving skills.
- Available for hybrid work arrangements and occasional travel to Medellín, Bogotá, Bucaramanga, and Tunja.
